## OBJECTIVE

A passionate and self-driven software developer with skills in Angular for frontend development and hands-on experience in full-stack projects using Node.js, I am seeking opportunities as an Angular Frontend Developer or Full Stack Developer. I aim to apply my project-based knowledge and grow my professional career in a dynamic organization.

## PROJECTS

### • Ecommerce App

- Tools, Technologies: Angular 17, Node.js, MongoDB, Express.js, Postman, Tailwind CSS, Angular Material
- Developed a fully functional eCommerce application with features such as product listings, shopping cart, order management, and wishlist.
- Implemented RESTful APIs using Node.js and Express.js to handle backend operations like product management, user authentication, and order processing.
- Integrated MongoDB for storing and managing data, including user details, product information, and orders

### • Task magement

- Tools and Technologies: Angular17, Node.js, Express, CSS, Tailwind Css, Angular Material, Postman, Git
- Developed a full-stack task management application that allows users to add, view, edit, and delete tasks
- Created a RESTful API using Node.js and Express to handle CRUD operations, storing tasks in JSON file for simplicity.
- Integrated Angular Material and tailwind css for an enhanced user interface and experience, including responsive design.

### • CRUD Operation

- Tools and Technologies: Angular17, Node.js, Express, CSS, tailwind css, Angular Material, Git, Postman.
- Express.js: Developed RESTful APIs to manage product listings, shopping carts, and user authentication
- JSON/REST API: Designed and integrated backend services using REST APIs.
- Data Management: mongoDB
